GARDENS

GLADIOLUS

165 WEST ST.

WAIRIE, MASS.

GREETINGS FRIENDS:

Thanks again for all past favors. They were deeply appreciated.

This season, we are featuring for your approval some imported varieties from Holland. Many of these varieties have bloomed from small bulbs and bulblets. Among the outstanding varieties were Ankara, Uncle Tom, Mansoer, and Topscore. The above Glads were in the darker shades. Sophia was outstanding. High Life and Silver Gull were excellent blues. Some light shades that were good were Leeuwenhorst, a lilac rose. Sweet Seventeen, fine novelty. Salmon's Glory even better than last year. Lavendel Dream, nice shade of lavender. Juniklokken (June Bells) a very early pure white. These are a few that come to my mind at this time of the Holland varieties.

Among the older varieties we like Victory Queen, Van Gold, Rosea, Ivy Robertson, Miss Wisconsin, Coutt's Orchid, and of course, Leading Lady (we can't leave that out). We believe Leading Lady to be the most outstanding Glad grown to date. No doubt there were many others that were outstanding in our garden this season, but these are a few that we want you to remember.

We are going to offer a few Do's and Don'ts for your Glad Garden.

First: open package as soon as received. Examine your bulbs, and, if you are not ready to plant, store them in your vegetable cellar, or a place where it is not too warm or too cold. After your soil has been prepared in the Spring of the year, furrow out your rows and scatter in the bottom of the trench, a good Commercial fertilizer such as 4-12-4, 4-8-10, or 5-10-10 or any other good Commercial fertilizer, that is available in your community. Mix well with the soil, setting large bulbs about five inches deep, and five inches apart, other size bulbs in proportion, with the smallest about two inches deep, and two inches apart. All Glad bulbs must be dipped before planting, in order to kill any thrips or disease that may be on them. We use Lysol. One and one-half tablespoonful per gallon of water. Soak bulbs three hours just before planting. Any water container will do. Do not plant near buildings, heavy rooted plants such as trees, etc. Cultivate frequently enough to keep soil loose, and free from weeds, not too deep, and after every heavy rain or watering. Spraying and dusting for thrip (adults are small black insects about 1/16 of an inch long) we have used the two following formulas:

DDT Spray—2 rounded teaspoonfuls DDT (50%) wettable; 1 teaspoonful Dreft; 2 gallons water, mix well and spray every week or ten days when foliage is about 8 or 10 inches high.

DDT Dust for thrip: 5% DDT dust and we use a roto dust gun. This is the quickest and easiest control. As effective as spraying but very much faster. We dust once in about every 10 days after foliage is 8 or 10 inches high. Do not use DDT dust on blooms as it will spot.

When cutting blooms be sure and leave at least four leaves so as to mature the bulb. Bulbs should be dug as soon as the foliage starts to become yellow or after a heavy frost. Dig bulbs when soil is dry if possible. Using a digging fork, lift bulbs by the foliage. Cut tops off close to the bulbs shaking out loose dirt. Use shallow wooden trays or clean paper bags, marking each variety. Curing and cleaning bulbs; remove bulbs to warm dry place where there is a good circulation of air. After a period of three or four weeks, or when bulbs are properly dried, old bulb is easily broken away from the base of the new bulb. Be sure and leave husk on bulb, as this is a protection in storing. Ideal storage temperature is between 34 and 45 degrees F, or in a good vegetable cellar.

Terms of sale: Cash with order, or twenty-five percent, the rest C.O.D. No order for less than two dollars and no item for less than ten cents please. We have made our prices low enough so as to eliminate all confusing discounts on both wholesale and retail. We are very liberal in our overcounts. All retail orders will be sent prepaid. If out of size wanted, we will ship next size, giving equal or better value.

If you send us names of friends that grow Glads with your orders, we will add extra bulbs as a reward.

These are State inspected bulbs. We try to and observe the fact that making friends is very essential to our business.

Sincerely yours,

TAYLOR GARDENS
